

AV DESIGN & INSTALLATION CASE STUDY

“

“The implementation was very smooth, the support we’ve been given is fantastic and the systems work really really well. I’m very very pleased.”

Andrew Prosse, Principal, Dubai Heights Academy

AV DESIGN & INTEGRATION BY GRANTEQ DUBAI HEIGHTS ACADEMY

Located in Al Barsha South, Dubai Heights Academy is a school that has exceptional facilities for the students. The campus consists of, apart from full facility school buildings, vast green space, multi-purpose hall, and swimming pool.

Granteq as their AV Integration partner recently commissioned state-of-the-art AV systems for their auditorium.

At the centre stage, a high-quality Large LED Screen of 7m x 4m acts as a display system providing a clear view of content to the audience.

A wireless presentation system based on Bring Your Own Device (BYOD), with which anyone seated across the auditorium can present their content from handheld devices, such as smartphones, tablets, computer etc.

The auditorium is integrated with high-performance professional audio with Line Array System, subwoofer, multichannel audio mixer, digital stage box and rope microphones on stage which helps to conduct un-hindered events such as drama or music. The facility also includes a throwable microphone, CatchBox, that both the presenter and the audience can use for highly interactive Q&A Sessions. The whole AV technology deployed here, helps everyone to talk and interact effortlessly.

The facility has a central control system for audio-visual elements, which can control lights, led screen, stage lights, either from the podium placed on the stage or directly from a control room within the auditorium

The central AV architecture is completely based on state-of-the-art digital integration that helps everyone to carry any media anywhere. This is a complete platform to transmit and distribute audio/video with an end-to-end solution for managing and distributing digital AV and control signals. The range of connectivity and switching for, In-room presentation, Video walls, Active learning & Digital signage combined with very high-quality audio and control systems provides a complete experience within the auditorium.
